

MOBILE APP PROVISIONING, DISTRIBUTION AND MGMT

Partnerpedia Enterprise AppZone is a solution that allows corporate IT to control the publishing, distribution and management of approved applications to end-user devices more effectively. Designed for tablets, and other smart devices, Enterprise AppZone is a way to ensure corporate policies and procedures are met while giving employees the user friendly experience found in consumer style app stores.

By distributing and managing apps using Enterprise AppZone, you can pre-select vetted apps for distribution to end-users, and ensure app integrity through built-in virus checking.

Benefits:

- SECURE PROVISIONING AND PROCUREMENT OF APPS; VETTING AND VIRUS CHECK
- IT MANAGED PUBLISHING AND DISTRIBUTION ENSURES POLICIES AND PROCEDURES
- USER ACCESS CONTROL WITH VERSION MONITORING AND REMOTE INSTALL/WIPE

Device Access

USER FRIENDLY, CORPORATE COMPLIANCE

Enterprise AppZone includes administration functions such as application publishing and approval, licensing management and reporting. End-users will find Enterprise AppZone as easy to use as their consumer counterparts.

Need 3rd party mobile apps? Enterprise AppZone also includes a mobile apps marketplace where IT can select and approve apps for end-users distribution. The apps marketplace includes pre-selected apps based on business categories. Credit card, volume licensing and PO procurement processes can all be handled.

Corporate App Store:

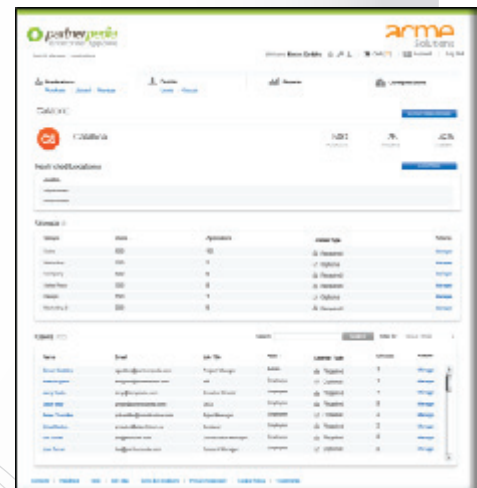

- Publishing & Distribution
- Virus Checking & Monitoring
- User Access Control
- Policy Management
- Internal/External Apps
- Mobile Content Publishing

Apps Marketplace:

- Pre-Vetted
- Business Categories
- PO & Volume Purchasing
- Free Apps
